

## PUBLIC HEARINGS

### 33. [Adopt Proposed Rule 1127 - Emission Reductions from Livestock Waste](#)

Tisopulos (909) 396-3123

(Itisopulos@aqmd.gov)

Proposed Rule 1127 would implement AQMP control measure WST-01 and certain Senate Bill (SB) 700 requirements for dairy operations. Its purpose is to reduce ammonia, VOC and PM10 emissions from dairy manure. Proposed Rule 1127 would affect dairy and related operations such as heifer and calf ranches, as well as manure processing operations such as composters and digesters. It establishes on-farm best management practices, manure disposal requirements, and approval requirements for manure processors. (Review: Stationary Source Committee, January 23, February 27, and April 23, 2004)
