

PART 70 PERMIT APPLICATION UPDATE

Due 6 months prior to permit expiration date.

1. hereby resubmits all of the information in our initial Part 70 operating permit application that is presently on file at the Chattanooga-Hamilton County Air Pollution Control Bureau except as changed by the attached Part 70 permit application forms, along with all previously submitted applications for permit modifications currently on file at the Chattanooga-Hamilton County Air Pollution Control Bureau, as its renewal application.

2. The permittee name on file with the Tennessee Secretary of State Business Services Division is

3. Responsible Official (*check one*)

The responsible official or officials are:

as shown on the present Part 70 permit.

changed for the renewal. Provide the name and title of each responsible official

Name	Title
------	-------

Name	Title
------	-------

4. Compliance Assurance Monitoring Rule (*check one*)

The Compliance Assurance Monitoring Rule (40CFR Part 64) does not apply to this facility.

The Compliance Assurance Monitoring Rule (40CFR Part 64) will apply to this facility upon renewal. If so, attach new compliance demonstration Part 70 permit application forms documenting the requirements of 40CFR Part 64.4. A new Form 70-19 is required. If monitoring compliance using control system parameters Form 70-22 is required. Depending on the monitoring strategy proposed, Form 70-20, 70-21, 70-23, 70-25, and/or 70-27 may also be required.

5A. The following additional applicable requirements should be added to our renewal Part 70 permit. Attach Form 70-30 showing all current applicable requirements if there are any changes in the applicable requirements.

- a.
- b.
- c.
- d.

5B. The following applicable requirements no longer apply and should be deleted from our renewal Part 70 permit:

- a.
- b.
- c.
- d.

6. The facility emissions summary is as shown below (If the emissions summary from the facility has changed, complete Form 70-29)

Pollutant	Allowable Emissions (TPY)	Potential Emissions (TPY)

7. Insignificant activities listed in our initial Part 70 operating permit application pursuant to Section 4-56 (c)(12) have changed as listed below. If there are any changes to the insignificant activities attach a completed Form 70-02 listing the current insignificant activities.

Insignificant Activity	Add	Delete

8. The following operational flexibility notification(s) previously sent to the Chattanooga-Hamilton County Air Pollution Control Bureau and to Region 4 EPA should be incorporated into the Part 70 permit. Attach the Part 70 permit application forms documenting any equipment replaced, or added, using operational flexibility provisions. (Forms 70-03 through 70-18 as appropriate.)

Description	Date Submitted

9. Attach a completed Form 70-01 with “Permit renewal to operate” checked and a completed Form 70-31.

Except as noted on the attached Compliance Plan and Compliance Certification (Form 70-31), I certify that this permittee has been in compliance with all applicable requirements contained in our existing Part 70 permit, will continue to comply with all applicable requirements, and will be in compliance with future applicable requirements to be added to the renewal Part 70 permit by the specified compliance date.

Based on information and belief formed after reasonable inquiry, the statements and information in this renewal application are true, accurate, and complete.

CAM Applicability

For many sources in Hamilton County, the Compliance Assurance Monitoring Rule (40CFR Part 64) will apply. If all of the following General Applicability Criteria in the rule are satisfied for a particular emission unit, the rule applies unless there is a specific exemption.

Applicability Criteria

1. The emission unit is subject to an emission limitation or standard for an applicable regulated air pollutant (or surrogate thereof), other than an emission unit that is exempt.
2. The emission unit uses a control device to achieve compliance with any such emission limitation or standard.
3. The emission unit has potential pre-control device emissions of the applicable regulated air pollutant that are equal to or greater than 100 percent of the amount, in tons per year, required for a source to be classified as a major source. For purposes of this paragraph, "potential pre-control device emissions" shall have the same meaning as defined in 40CFR Part 64.1, except that emissions reductions achieved by the applicable control device shall not be taken into account.

The only exemption that would appear to apply to existing sources in Hamilton County is the following:

The emission unit is subject to emission limitations or standards proposed by the administrator after November 15, 1990 pursuant to section 111 or 112 of the Act. This exemption is for sources subject to New Source Performance Standards or National Emission Standards for Hazardous Air Pollutants proposed after the November 15, 1990.

To meet the requirements of the Compliance Assurance Monitoring Rule as shown in 40CFR 63.4, the owner or operator will be required to specify and justify the ranges of parameters to be monitored. These ranges and justifications can be specified using the appropriate Compliance Demonstration forms from the Major Source Operating Permit Application Forms. (Form 70-19 through 70-28 as appropriate.)
